24000 S.W. 97 Avenue
(Use Main Entrance and
Please Follow Signs Posted)

Solid Waste Management

Improper disposal of oil-based paints, mineral spirits, pool chemicals, pesticides, herbicides and other home chemicals can pollute our sensitive South Florida environment. Bring them to our special Home Chemical Collection event. We'll dispose of or recycle up to 50 pounds of home chemical for you, safely and free of charge if you're a non-commercial resident.

- Keep the products in their original containers. Label them.
- Make sure the lids are on tight. If the containers are leaking, pack them in a larger container along with an absorbent material such as newspaper.
- Place all containers in sturdy boxes and keep them away from passengers.
- We do not accept explosives, radioactive or infectious wastes.

➤ Latex paints can be disposed of with your regular garbage as long as the paint is completely dried out. To speed up the drying process, add an absorbent such as sand, kitty litter or crumbled newspaper that completely absorbs all liquids.

We accept used electronics such as computer monitors, televisions, personal computers, keyboards, hard drives, printers, VCRs, audio and video equipment, cellular phones and hand-held radios.
